Location: 15.3 nm SSW of the Complex Support Facility

Type: IIIC

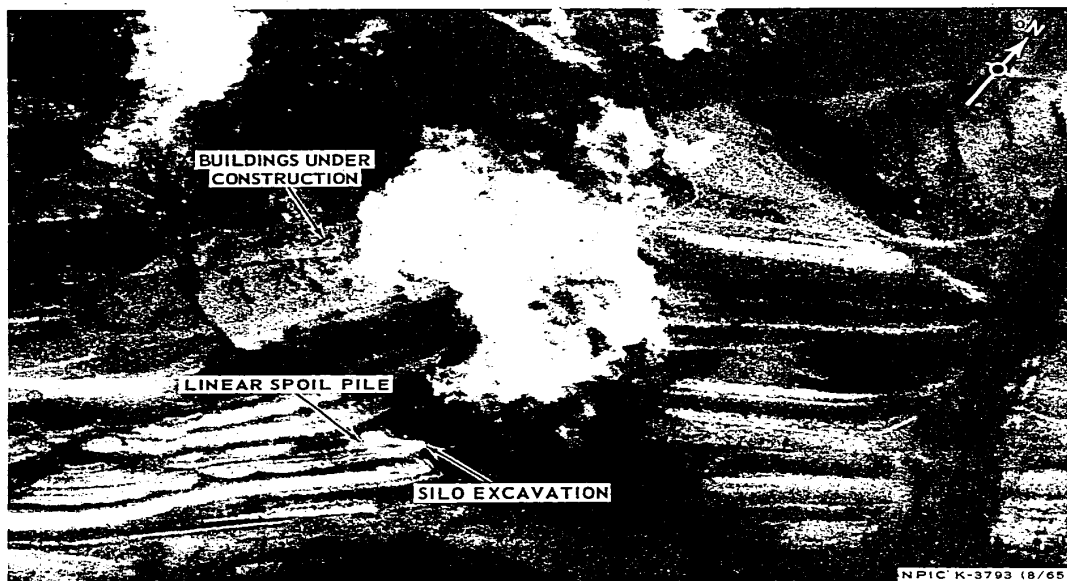

Negation Date:

Stage of Construction: Early

Date First Seen

25X1D

A square silo excavation, with 2 linear spoil piles located contiguous to 2 probable earthen access ramps into the excavation, is situated at the edge of a triangular-shaped patch of woods. A probable security fence encloses this general area. There are foundations for 3 large buildings and several smaller buildings to the west of the secured area. Clouds preclude stereo interpretation of the buildings.
